# UConn theme

The `uconn` Beamer theme, stored in the file `beamerthemeuconn.sty`, simply invokes four specific `uconn` Beamer themes, stored in the following files:

- `beamercolorthemeuconn.sty`
- `beamerfontthemeuconn.sty`
- `beamerinnerthemeuconn.sty`
- `beamerouterthemeuconn.sty`

This example slideshow is just a concatenation of two example slideshows for the color and font themes (`uconn-color-font-example.tex`) and for the inner and outer themes (`uconn-inner-outer-example.tex`).

# Background

A large, faded navy blue oak leaf graphic is positioned on the left side of the slide, extending from the top left towards the bottom left. It serves as a background element for the 'Background' section.

The background image is a faded navy blue oak leaf, stored as a PNG. Like the other images used in this theme, it comes from the [bulk logos download at UConn Brand Standard](#).

# Symbols

The classic (black) oak leaf is encoded as a symbol `\oakleaf`, and can be used in mathematical environments, e.g.

$$\text{\oakleaf}^{\mathbb{C}} = \text{\oakleaf} \otimes_{\mathbb{R}} \mathbb{C},$$

or in text ()

An inverted-color oak leaf is encoded as `\oakleafbox` (see the slide on claims and proofs).

# Blocks

## **Block**

This is a text block, formatted as in the default template.

## **Alert block**

This is an alert text block, also formatted by default.

More may be done in future to customize the block environments. Suggestions are welcome!

# Definitions and examples

## Definition

A **definition** block is by default formatted like a text block.

Text formatting like `\bfseries` (boldface) can be called within blocks.

## Example

An *example* is also a block, formatted a bit differently.

# Claim and proof environments

## Theorem

*Claim blocks, including lemma, theorem, and corollary, use slant-shaped font (`\slshape`) to emphasize their contents.*

## Proof.

This proof block shows that the proof-ending symbol has been changed from the customary square to a UConn oak leaf (white inside a black square).

## Corollary

*The box oak leaf can also be used inline:*

## Default font family

The default font family is Arial, which is used in the PowerPoint templates (see the [Acknowledgments slide](#)).

# Palette colors

The palette colors used by outer themes interpolate between navy blue and white:

palette

primary
secondary
tertiary
quaternary

palette sidebar

primary
secondary
tertiary
quaternary

For example, palette secondary is defined using

```
bg=uconn navy blue!80!uconn white,fg=uconn white
```

# Frame element colors

The symbol colors for itemized and enumerated lists progress

- from purple,
  - through orange-gold,
  - to green.

Alerted text is rendered in orange-gold.

## **Remark**

*Block and caption titles are boldfaced and rendered in dark red.*

Hyperlinks and buttons are rendered in teal blue. See [Customization](#) and [Acknowledgments](#) for examples.

# Manually assigning colors

Type

```
{\color{uconn purple} purple}
```

(with brackets) to render **purple**, or set

```
\color{uconn health bright teal}
```

(without brackets) to color all text in a slide the bright teal in the UConn Health palette.

Color names are based on the UConn Brand color palette.

[Visit the Brand Standards website](#)

# Changing the theme

You can change the default colors by using `setbeamercolor` in the preamble, as i did:

```
\setbeamercolor*{titlelike}{  
  bg=uconn navy blue,  
  fg=uconn white  
}
```

...or by editing the color theme file `beamercolorthemeuconn.sty`. Please [check with the Brands office](#) about using the derivative theme, e.g. one with the colors themselves altered.

# Acknowledgments

See the color/font themes example and the inner/outer themes example for specific acknowledgments.

Suggestions are always welcome! Email Cory:
