UConn theme

The uconn Beamer theme, stored in the file beamerthemeuconn.sty, simply invokes four specific uconn Beamer themes, stored in the following files:

- beamercolorthemeuconn.sty
- beamerfontthemeuconn.sty
- beamerinnerthemeuconn.sty
- beamerouterthemeuconn.sty

This example slideshow is just a concatenation of two example slideshows for the color and font themes (uconn-color-font-example.tex) and for the inner and outer themes (uconn-inner-outer-example.tex).

Icons

The background image is a faded navy blue oak leaf, and the footer includes a UConn Health woodmark, both stored as PNGs. They are activated by the watermark and logo options, with some additional options that control the logo:

```
\usetheme[
  campus=health,
  watermark=oakleaf,
  logo=stacked
]{uconn}
```

See uconn-inner-outer-theme-example.tex for details on the logo options.

Like the others used in this theme, the image comes from the bulk logos download at UConn Brand Standard.

Symbols

The classic (black) oak leaf is encoded as a symbol \oakleaf, and can be used in mathematical environments, e.g.

$$\boldsymbol{\Psi}^{\mathbb{C}}=\boldsymbol{\Psi}\otimes_{\mathbb{R}}\mathbb{C},$$

or in text (*).

An inverted-color oak leaf is encoded as \oakleafbox (see the slide on claims and proofs).

Blocks

Block

This is a text block, formatted as in the default template.

Alert block

This is an alert text block, also formatted by default.

More may be done in future to customize the block environments. Suggestions are welcome!

Definitions and examples

Definition

A **definition** block is by default formatted like a text block.

Text formatting like \bfseries (boldface) can be called within blocks.

Example

An example is also a block, formatted a bit differently.

Claim and proof environments

Theorem

Claim blocks, including lemma, theorem, and corollary, use slant-shaped font (\slshape) to emphasize their contents.

Proof.

This proof block shows that the customary open square tombstone has been changed to a UConn oak leaf (white inside a black square).

Corollary

The box oak leaf can also be used inline: M

Default font family

The default font family is Arial, which is used in the PowerPoint templates (see the Acknowledgments slide).

Palette colors

The palette colors used by outer themes interpolate between navy blue and white:

palette	palette sidebar
primary	primary
secondary	secondary
tertiary	tertiary
quaternary	quaternary

For example, palette secondary is defined using

bg=uconn navy blue!80!uconn white,fg=uconn white

Frame element colors

The symbol colors for itemized and enumerated lists progress

- from purple,
 - through orange-gold,
 - to green.

Alerted text is rendered in orange-gold.

Remark

Block and caption titles are boldfaced and rendered in dark red.

Hyperlinks and buttons are rendered in teal blue. See Customization and Acknowledgments for examples.

Manually assigning colors

Type

```
{\color{uconn purple} purple}
```

(with brackets) to render purple, or set

\color{uconn health bright teal}

(without brackets) to color all text in a slide the bright teal in the UConn Health palette.

Color names are based on the UConn Brand color palette.

Visit the Brand Standards website

Changing the theme

You can change the default colors by using setbeamercolor in the preamble, as i did:

```
\setbeamercolor*{titlelike}{
  bg=uconn navy blue,
  fg=uconn white
}
```

...or by editing the color theme file beamercolorthemeuconn.sty. Please check with the Brands office about using the derivative theme, e.g. one with the colors themselves altered.

Acknowledgments

See the color/font themes example and the inner/outer themes example for specific acknowledgments.

Suggestions are always welcome! Email Cory:
